

WE CARE FOR OUR PLANET

Our commitment to the environment has been proactive! Find out more about our alternative courses of action to offset our greenhouse gases emissions back in 2021 (scope 1 and 2).

WE CALCULATE

Let us begin!

We have been measuring and recording the carbon footprint at our 2 locations, **Barcelona and Madrid**, since 2018.

WE REDUCE

Let's do it!

We formulated and implemented **a plan to reduce emissions**.

27% ↓

This resulted in **reduced emissions** during the period 2019-2021 compared to the period 2018-2020.

WE COMPENSATE

Let's keep going!

We are participating in a CO2 absorption project.

We have been actively involved in a reforestation project, in an area destroyed by a forest fire by planting various endemic tree species, thereby mitigating the effect of natural erosion, increasing biodiversity and improving the texture and organic composition of the soil.

Location

Monte Veciñal in Mano común de Laxos and Cardecide 2 (Pontevedra)

Surface:
16,63
hectares

Trees

Types of trees planted: Pine, Eucalyptus, Oak and Chestnut.

2.708

tons of CO2 have been permanently absorbed

Project
Monte Veciñal

STH ★
compensated
its **2021 carbon footprint**,
(scope 1 and 2)

We close the cycle!!

We have just been awarded the **'Calculate-Reduce-Compensate' certificate**. This prestigious certificate is awarded to companies that, apart from calculating their greenhouse gas emissions for a minimum period of 4 years, take all necessary measures to reduce them and then even go one step further to offset their total carbon footprint.
